

# Assumptions and Prerequisites (CentOS 9)

## 1. System Requirements

- CentOS 9 server (or RHEL 9)

```
[root@agent01 ~]# cat /etc/redhat-release
CentOS Stream release 9
[root@agent01 ~]#
[root@agent01 ~]# date
Sat 03 Jan 2026 02:35:31 PM +08
[root@agent01 ~]# █
```

- 4 GB RAM and 10 GB drive space recommended

# Assumptions and Prerequisites (CentOS 9)

## 2. Admin Privileges Account and Puppet Agent

- User with sudo privileges [here using root]

```
[root@agent01 ~]# id  
uid=0(root) gid=0(root) groups=0(root) context=unconfined_u:unconfined_r:unconfined_t:s0-s0:c0.c1023  
[root@agent01 ~]#  
[root@agent01 ~]# whoami  
root  
[root@agent01 ~]#
```

- Puppet agent installed on the node

```
[root@agent01 ~]# rpm -qa|grep -i puppet-agent  
puppet-agent-6.28.0-1.el9.x86_64  
[root@agent01 ~]#  
[root@agent01 ~]# █
```

# Assumptions and Prerequisites (CentOS 9)

## 3. Access to Repositories

Agent should have access to below repositories.

1. Jenkins repository
  - a. <https://pkg.jenkins.io/redhat-stable/jenkins.repo>
    - i. Required packages
      1. Jenkins
      2. fontconfig
2. Adoptium/OpenJDK repository
  - a. [https://packages.adoptium.net/artifactory/rpm/rhel/\\$releasever/\\$basearch](https://packages.adoptium.net/artifactory/rpm/rhel/$releasever/$basearch)
    - i. Required packages
      1. java-21-openjdk

**Note:** if the agent does not have internet access, the repositories can be mirrored and hosted internally in:

- Git/GitHub/Bitbucket
- S3 bucket or internal artifact repository

# Assumptions and Prerequisites (CentOS 9)

## 4. Services and ports

- TCP port **8000** (custom Jenkins port) should be allowed to access Jenkins UI

```
[root@agent01 ~]# firewall-cmd --list-all |grep -i 8000
  ports: 8000/tcp
[root@agent01 ~]#
[root@agent01 ~]# █
```

# Assumptions and Prerequisites (CentOS 9)

## 5. Puppet Setup

- Puppet server installed and running

```
[root@master ~]# rpm -qa|grep -i puppetserver
puppetserver-7.17.3-1.el9.noarch
[root@master ~]#
[root@master ~]# systemctl is-active puppetserver
active
[root@master ~]# █
```

- Node connected to Puppet master
- Create jenkins directory inside puppet modules and put the puppet code inside init.pp file
  - a. /etc/puppetlabs/code/environments/production/modules/jenkins

```
[root@master ~]#
[root@master ~]# ls -ld /etc/puppetlabs/code/environments/production/modules/jenkins
drwxr-xr-x 4 root root 36 Jan  3 13:43 /etc/puppetlabs/code/environments/production/modules/jenkins
[root@master ~]# ls -ltr /etc/puppetlabs/code/environments/production/modules/jenkins/manifests/
total 4
-rw-r--r-- 1 root root 2262 Jan  3 14:13 init.pp
[root@master ~]# █
```
